

# Asian Transport Outlook (ATO)

## How much is the transport share in household expenditures?

The total value of transport related household consumption expenditures (at purchasers' prices, including purchasing vehicles, operation of personal transport equipment, transport services) in the ATO economies is estimated at 2.1 trillion USD in 2017<sup>1</sup>. The global share of the ATO economies in transport related household expenditure is close to 36%. The average transport share in total household consumption expenditure for ATO economies is about 7% (Fig. 1). For some economies like India, Indonesia, Malaysia, Sri Lanka, Taipei, China it is above 10% of total household expenditure.
