

Raising Ambition for Transport in your Nationally Determined Contributions

Join Us!  www.slocat.net/ndcs

01 Mitigation Targets

Set specific targets for transport CO₂ emission reductions by 2035 aligned with the goal of limiting global warming to 1.5°C, supported by sustainable transport measures.

02 Engagement

Work with cities and regions, companies, civil society and academia to develop robust and implementable targets.

03 Maximise Impacts

Align and integrate sustainable low carbon transport strategies with your Long-Term Low Emissions Development Strategies, national policy frameworks and wider sustainable development priorities.

04 A-S-I

Incorporate Avoid, Shift, and Improve strategies to reduce the negative environmental impact of transport and increase equitable access.

05 Finance & Investments

Shift finance towards low carbon and resilient transport priorities, eliminate fossil fuel subsidies and phase out internal combustion engines.

06 Planning & Tools

Integrate urban, transport and land use planning policies and tools to support the achievement of your transport targets

07 Adaptation

Set goals and mode-specific measures for the adaptation and resilience of transport systems.

08 Electrification

Accelerate electrification of buses, cars, vans and 2- and 3-wheelers powered by renewable energy sources.

09 Freight

Address freight transport emissions, which account for 40% of energy use in the transport sector.

10 Aviation and Maritime

Include goals on aviation and maritime transport - two of the fastest growing sectors.
