Transport in Climate Policy

Introduction & Context

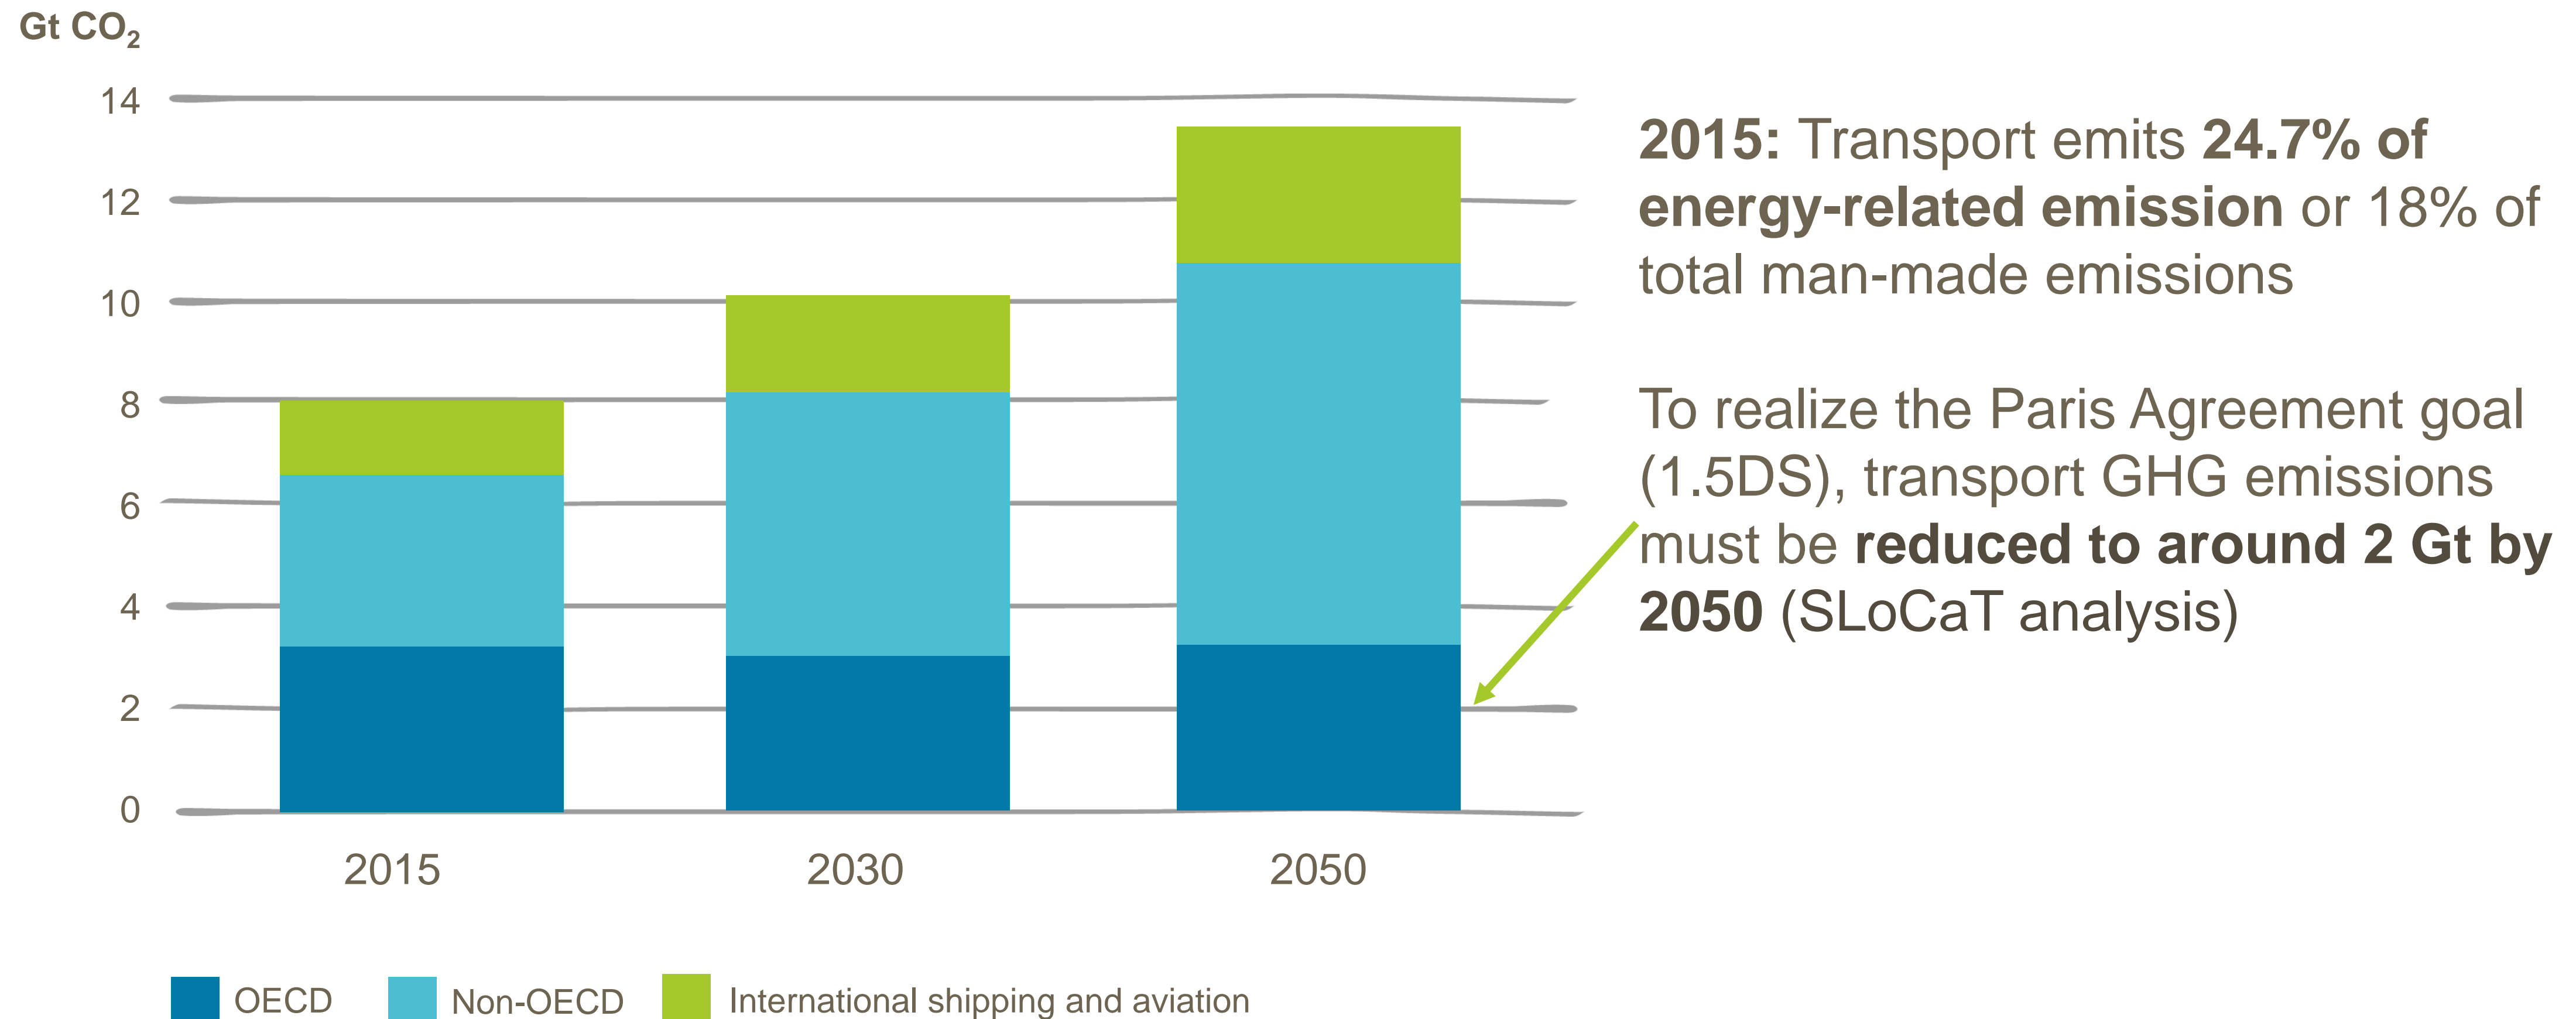

Urda Eichhorst

Mobilising Transport for Global Climate Action, SB 48, 01 May 2018

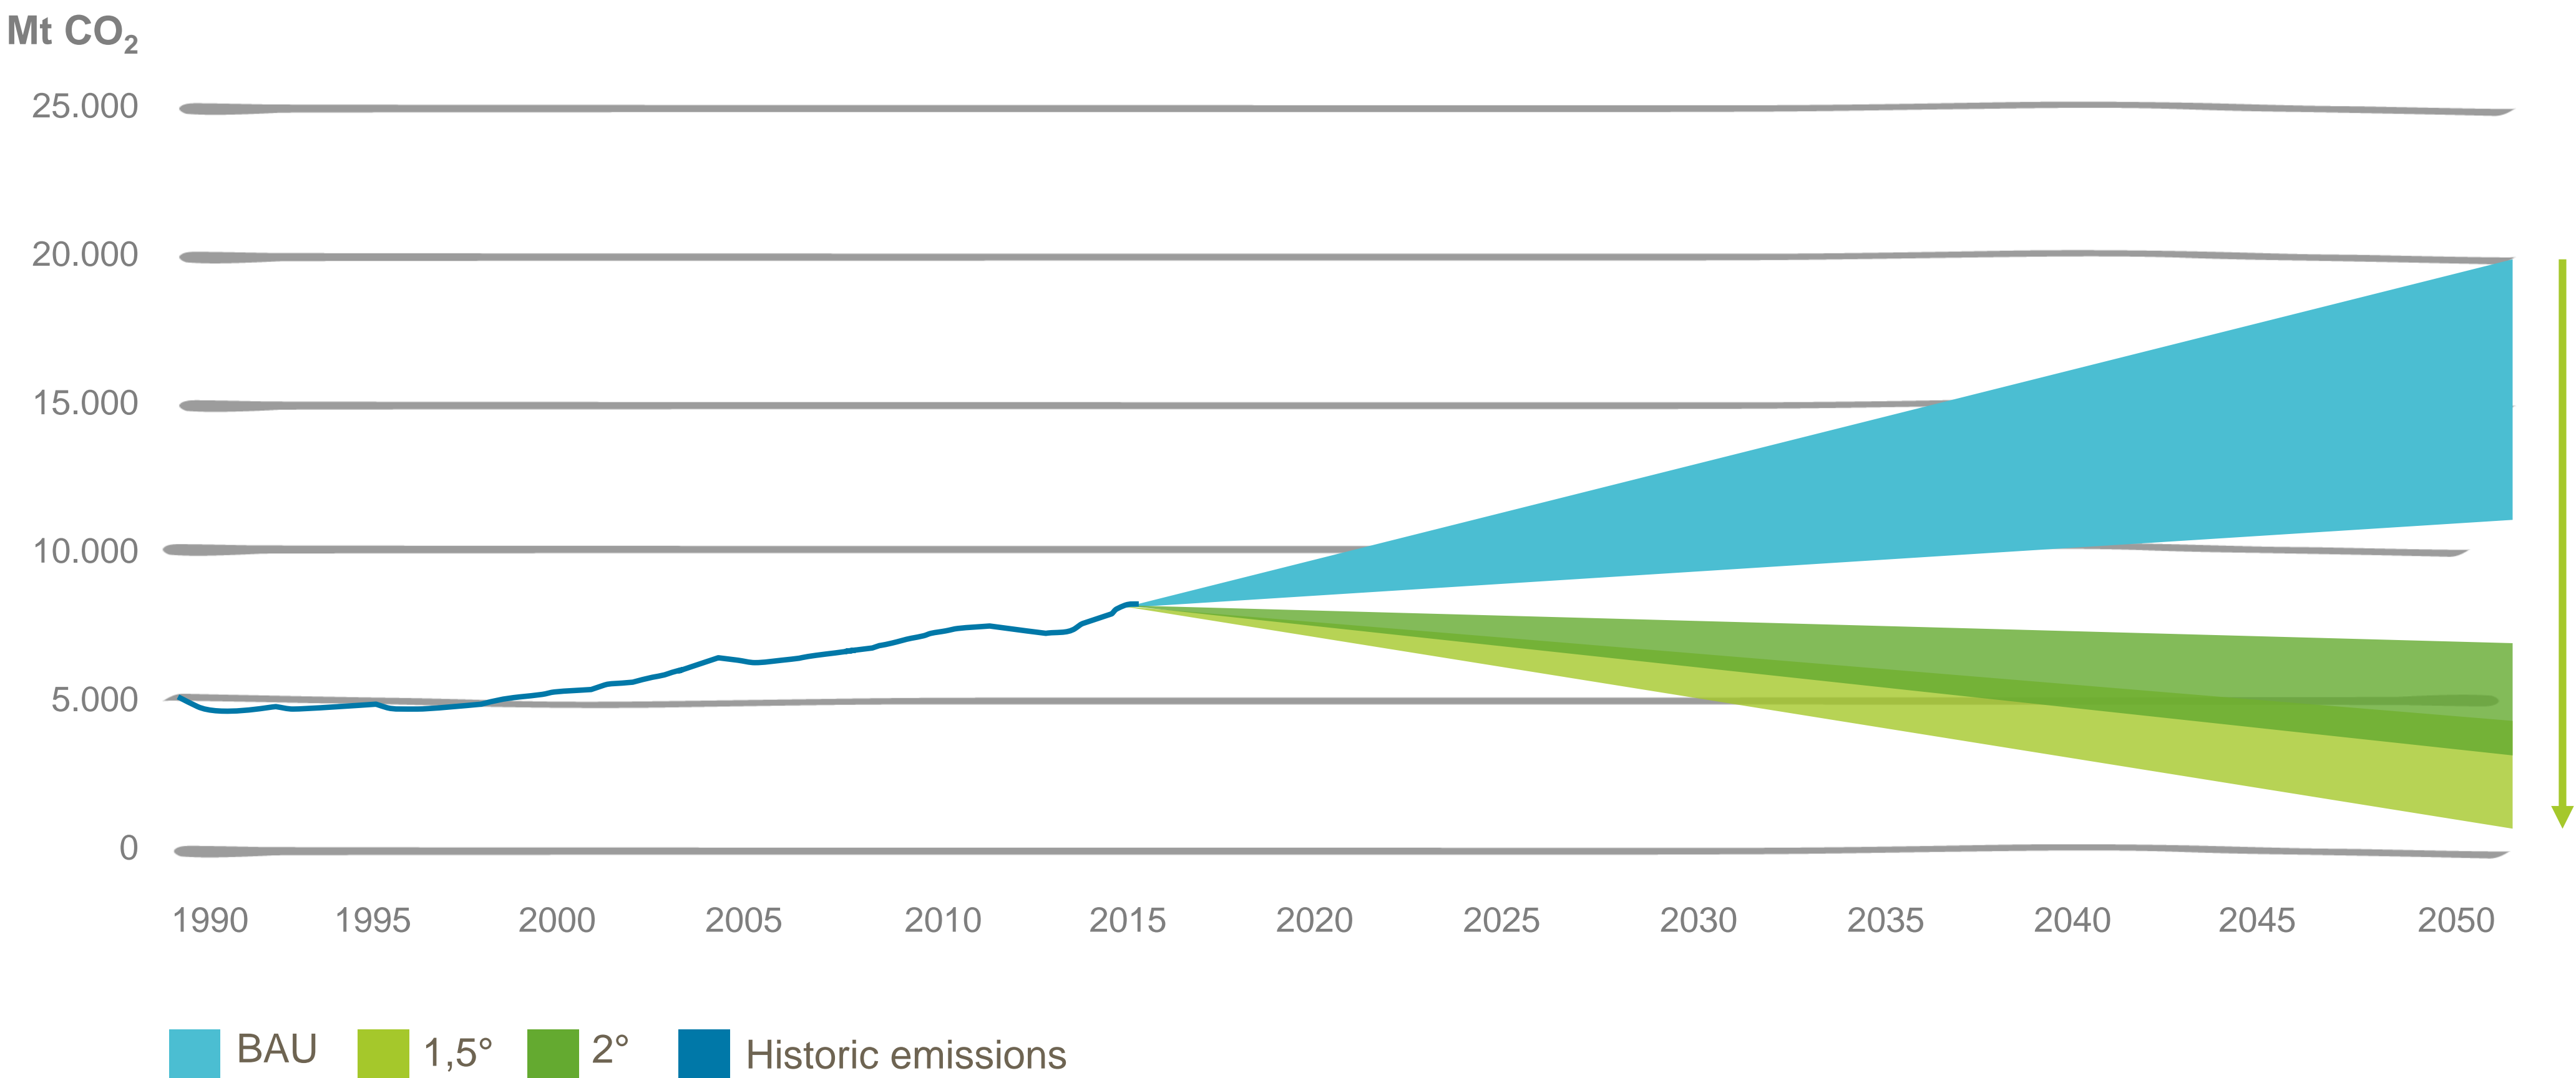

<2°C Requires Large Emission Reductions from Transport

Global transport emissions in 2015, 2030 und 2050 (ITF baseline scenario)

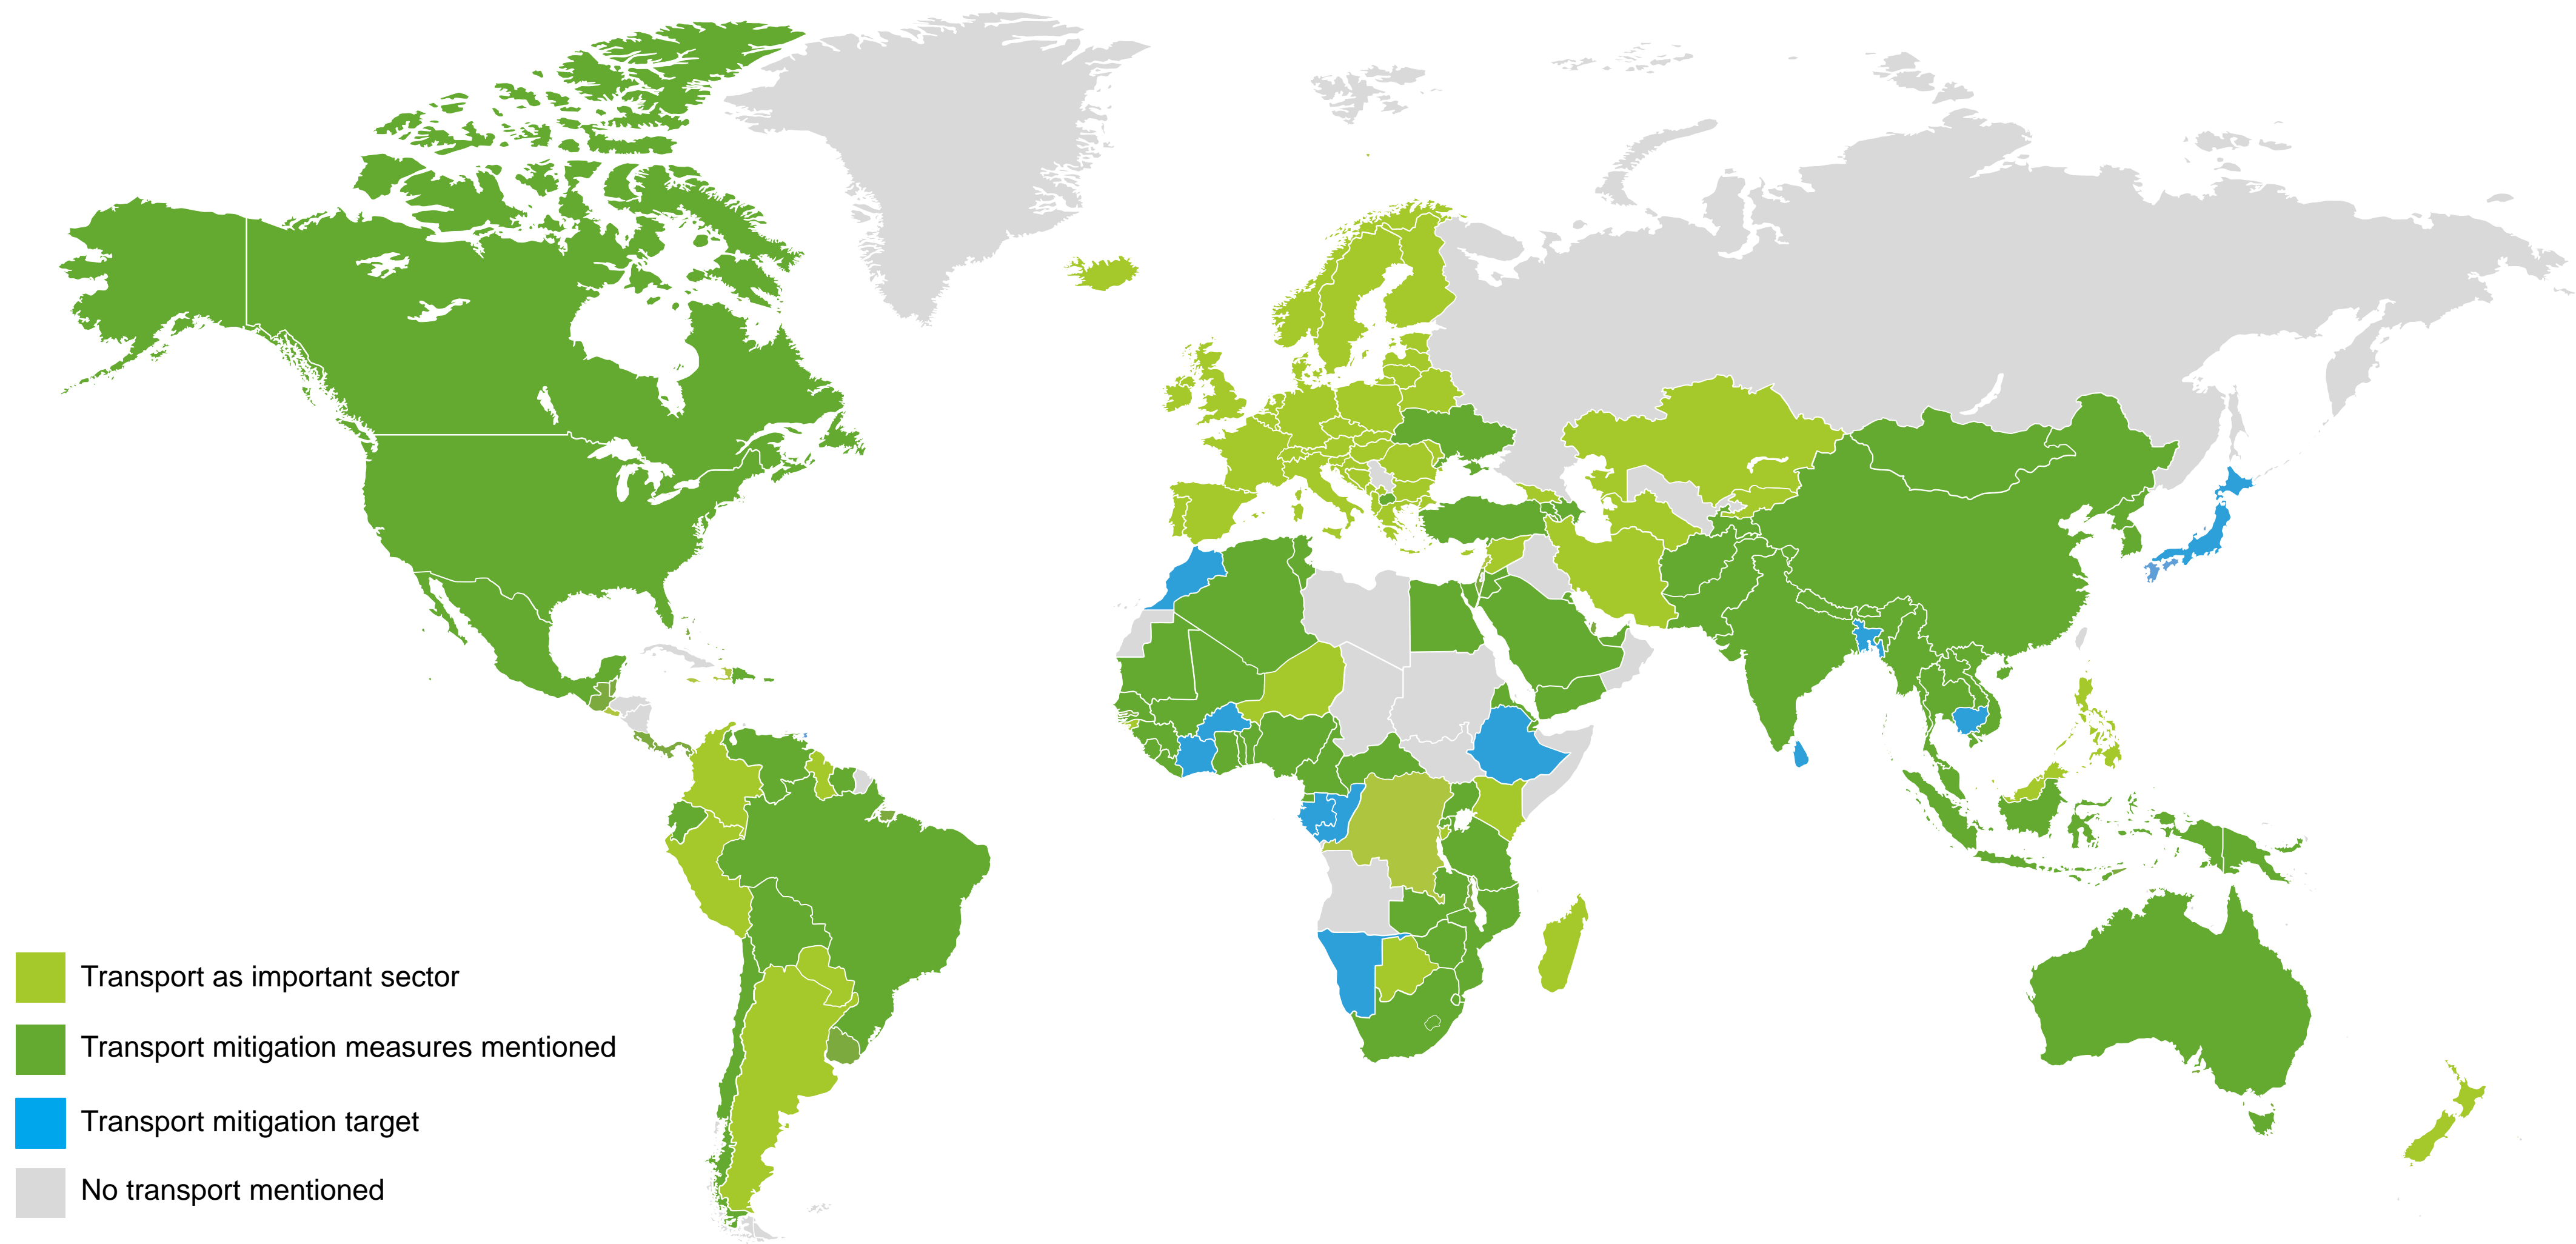

Where we have to go with transport emissions

Transport emission scenarios (BAU) and 2°C and 1.5°C (simplified)

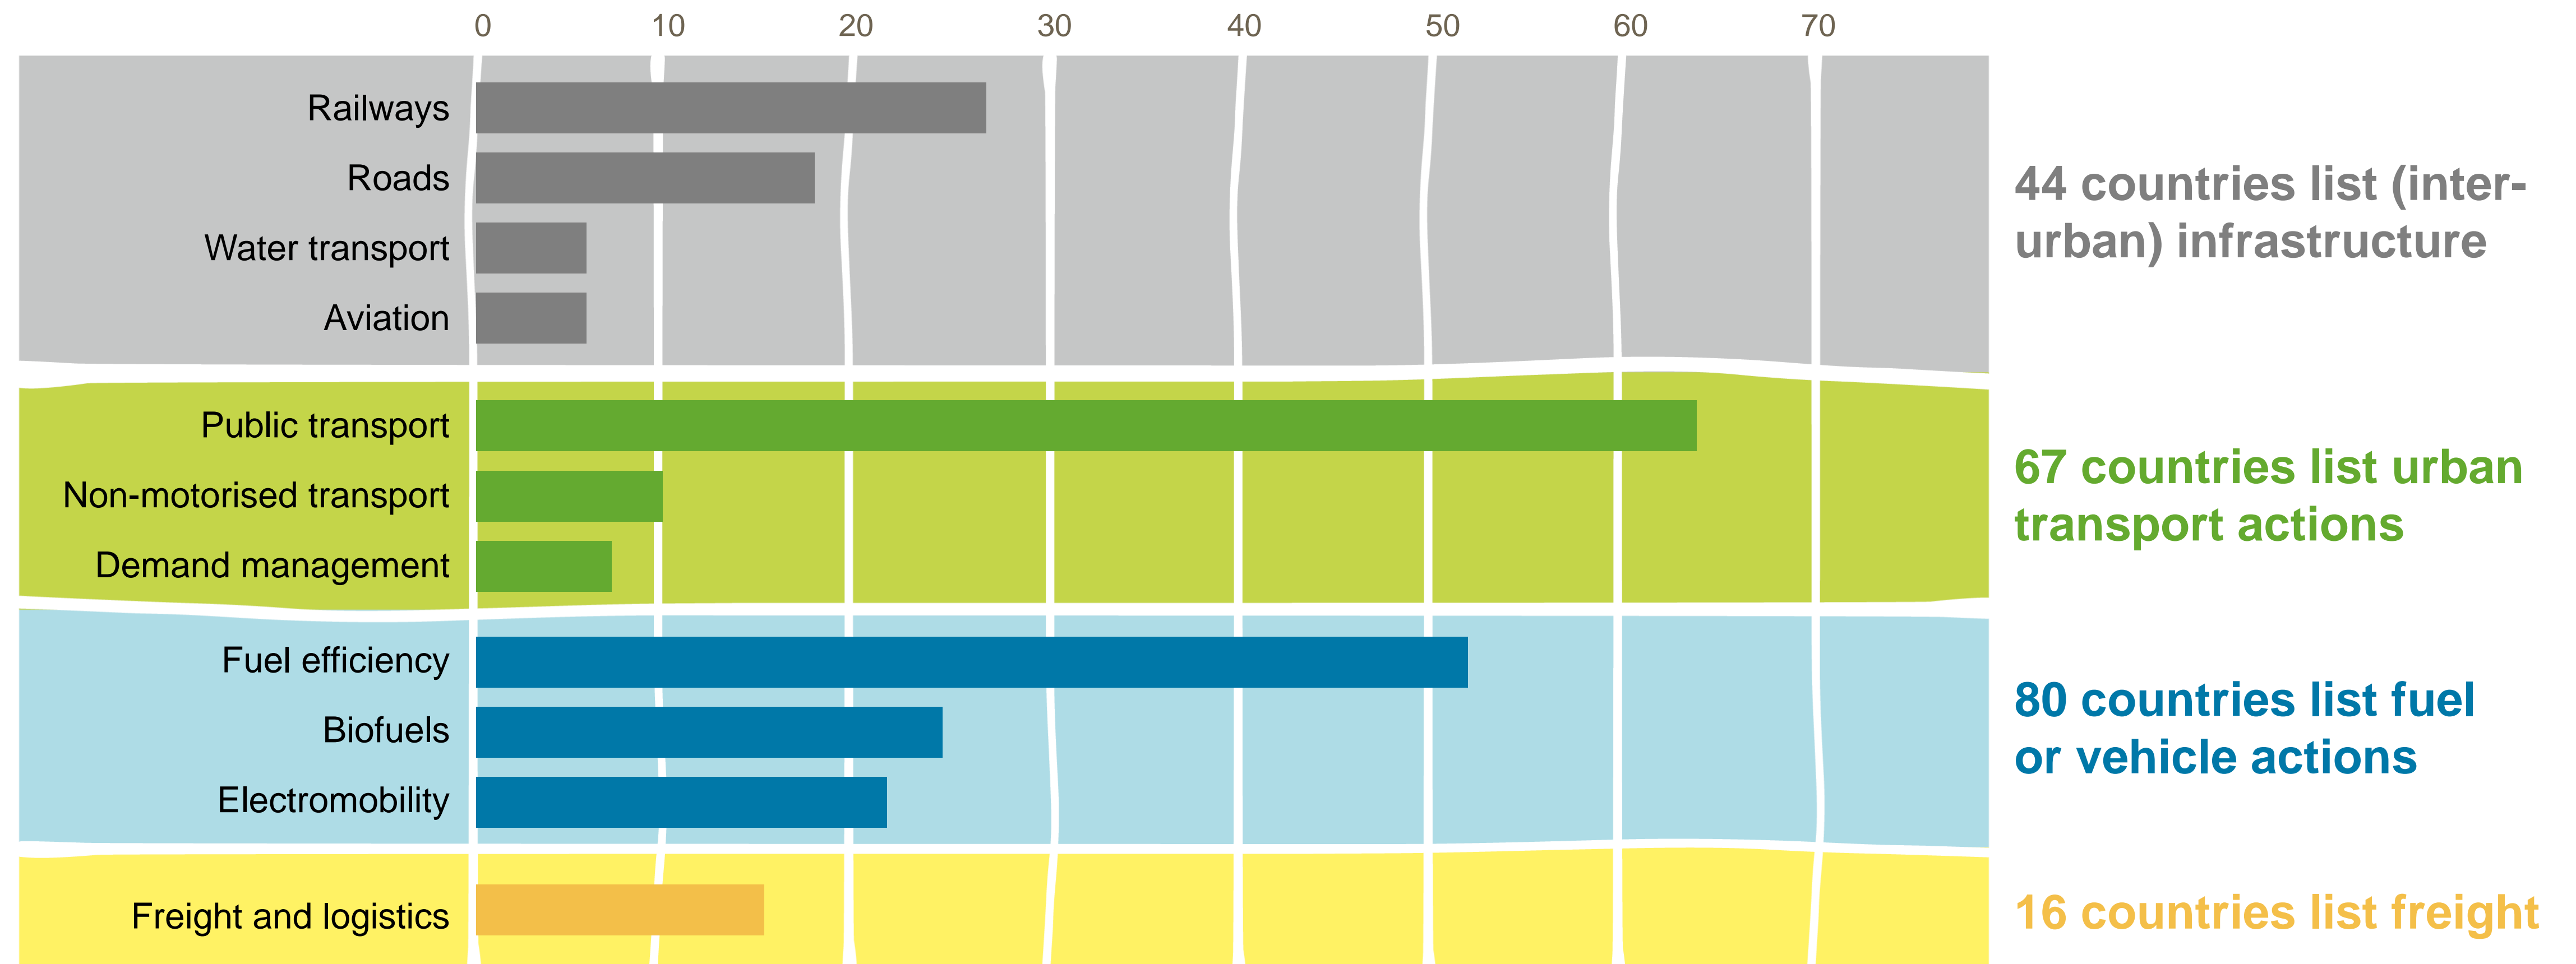

Transport Plays Strong Role in NDCs ... but more ambition is needed

Mitigation actions in NDCs – good start, not enough

giz Deutsche Gesellschaft
für Internationale
Zusammenarbeit (GIZ) GmbH

Analysis of 154 NDCs from developing countries

UNFCCC Parties have a key role to play

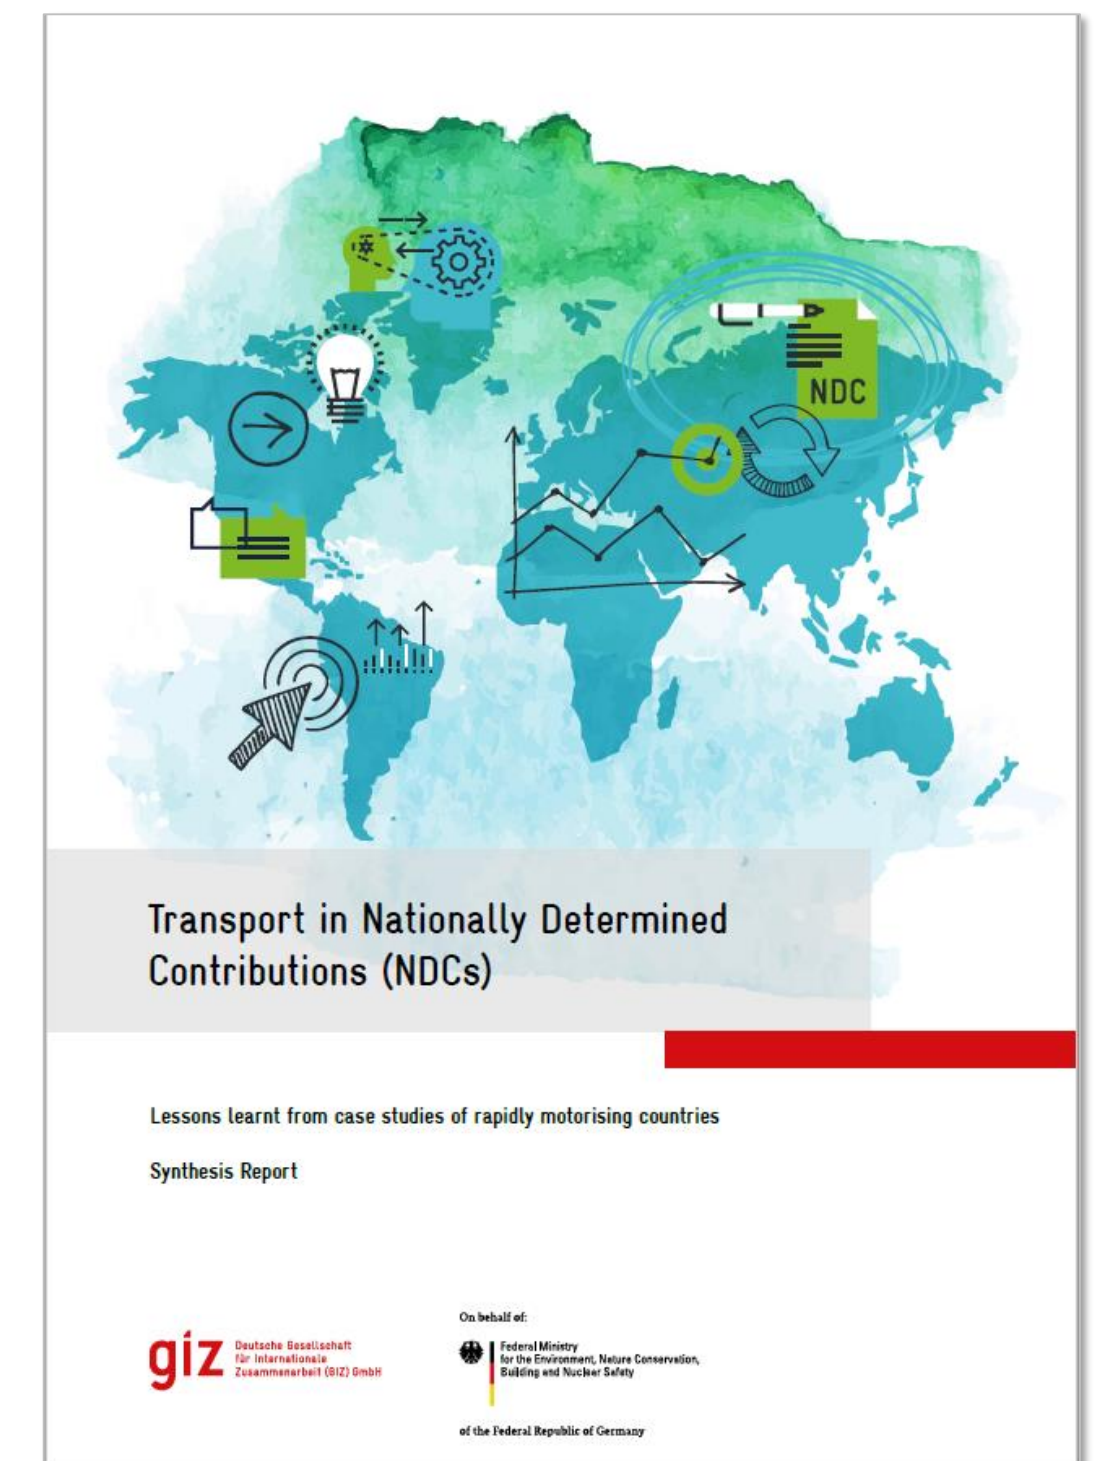

- Cost effective measures are available
 - Expert consensus on solutions
 - Avoid, Shift & Improve
 - All modes
 - Passenger and freight
 - Improve access and deliver broad sustainable development benefits
 - Successfully tested at scale, but ...
 - Not comprehensively implemented – political barriers
- **How can we improve the engagement of Parties?**
- National and international policy frameworks required to catalyse non state action and trigger private investment
