Around 7 million people died prematurely in 2012 as a result of air pollution exposure

**TARGET:** *Increase urban population with air quality within WHO limits by an additional 1.5 billion persons by 2030*

### Process Indicators:

- PM10 and/or PM2.5 air pollution from passenger and freight vehicles by 2030 (desired achievement: 70% reduction compared to 2010).
- Phase-out all motor vehicle fossil fuel subsidies by 2020.
- Proportion of urban dwellers engaging in adequate outdoor physical exercise according to WHO.
